JOÃO FERREIRA

FRONT-END DEVELOPER

/ ABOUT ME

With almost a year of experience as a Front-End Developer, I decided to pursue a CTESP in Mobile Development to expand my expertise beyond web development and specialize in building mobile applications.

In my free time, I develop projects using React Native, exploring its potential to create cross-platform applications with a smooth and native-like user experience.

I am also eager to enhance my ability to work in a team environment and learn from more experienced developers while refining my technical skills.

/ LANGUAGE SKILLS
