// about

Front-End Developer for a bit over two years, working on websites (Webflow, WordPress) and HTML email. On the side I build React Native apps with Firebase and Node.js.

// experience

Front-End Developer · uClockit · Remote — 09/2026 – 11/2026

- > Migrated uclockit.pt from SimplySite to Webflow end to end — rebuilt every page, set up the blog on Webflow CMS and handled DNS and domain configuration.
- > Built the monthly newsletter in responsive, table-based HTML, tested in Outlook, Gmail and dark mode, and sent through Pipedrive.
- > Set up Pipedrive automations so emails go out automatically.
- > Configured Google Ads, cookie consent and SEO for the site.

`Webflow` `DNS` `HTML email` `Pipedrive` `SEO` `Google Ads`

Front-End Developer Intern · uClockit · Remote — 04/2026 – 08/2026

- > Final internship of my CTeSP.
- > Gave the SimplySite websites of uClockit and of the main company, makeitspecial.pt, a more modern look using custom HTML, CSS and JavaScript.

`SimplySite` `HTML` `CSS` `JavaScript`

Front-End Developer (Freelance) · WayNext — 08/2024 – 08/2026

- > Turned the agency's Figma and Adobe XD designs into HTML email templates, built from scratch following email best practices.
- > Clients included companies in banking, tech and consulting.

`HTML email` `CSS` `JavaScript` `Figma` `Adobe XD`

Front-End Developer Intern · WayNext — 05/2024 – 08/2024

- > Helped build and customize WordPress sites and looked after the plugins.
- > Built HTML email templates.
- > Developed more complex HTML components that had to work well across devices.

`WordPress` `HTML` `CSS` `HTML email`

// projects

Prodify · mobile app + REST API — github.com/m4ferreirac/Prodify

- > Kanban task manager with manager and programmer roles, stats, CSV export and time estimates based on story points. Course project, built solo.

`React Native` `Expo` `Node.js` `Express` `Firebase Auth` `Firestore`

Mappie · mobile app — github.com/m4ferreirac/Mappie

- > Finds nearby EV charging stations. Course project, built solo.

`React Native` `Expo` `Axios` `Google Places API` `Clerk` `Firebase Firestore`
